

CHERIVIRALA NIKHIL

ASSOCIATE SOFTWARE ENGINEER

+91-9381520954 | nikhilguptha06@gmail.com | linkedin.com/in/cheriviralanikhil

SUMMARY

Associate Software Engineer with hands-on experience designing, developing, and testing software solutions that deliver reliable features and meet quality standards. Proficient in component design and development using Java and Python, with demonstrated expertise in automated testing frameworks (Selenium WebDriver, Jenkins), API testing (Postman), and technical documentation. Experienced in applying best practices for code quality, unit testing, and system integration. Skilled in collaborating with team members, learning from feedback, and taking ownership of assigned tasks to ensure timely delivery of value to end users.

SKILLS

Technical Skills: Machine Learning, NLP, RAG, Prompt Engineering

Programming Languages: Java, Python, SQL, C++, R

Testing Tools: Selenium WebDriver, Postman, Automation Testing, Manual Testing, Regression Testing, Smoke Testing, Functional Testing

Technologies & Tools: Tableau, Power BI, Hadoop, Spark, Hive, MySQL, Vector Databases, Git, GitHub, Jenkins, Azure DevOps, Excel

EXPERIENCE

Associate Software Engineer, MAQ Software — Nov. 2025-Present

- Designed and executed manual test cases for UI and API functionalities, performing API testing using Postman to validate component behavior against functional specifications; identified and logged 15+ defects with detailed reproduction steps and validated fixes through retesting, ensuring high-quality delivery.
- Designed, developed, and maintained automated Smoke and Regression test scripts for three core application functionalities covering both UI and API testing using Selenium WebDriver and Java.
- Executed automated Smoke and Regression pipelines through Jenkins across multiple environments, analyzed test execution results to identify failure patterns, and investigated root causes through debugging and impact analysis, enabling faster resolution of integration issues.
- Utilized Git for version control and branch management while maintaining automation scripts across multiple development branches, following team SDLC practices to ensure code quality and traceability.

University FAQ RAG Chatbot

- Built a Retrieval-Augmented Generation (RAG) chatbot that answers university FAQs from uploaded PDF documents using sentence embeddings and semantic search.
- Implemented TF-IDF and Logistic Regression based question classification and integrated Groq API with LLaMA 3.1-8b for grounded response generation.
- Developed the complete pipeline including PDF extraction, chunking, embedding generation, vector search using NearestNeighbors, and Streamlit deployment.

Global Sales and Profit Insights Dashboard

- Designed an interactive Tableau dashboard to analyze sales and profit across 165 countries and 1,102 states using geospatial visualizations and KPI metrics.
- Implemented filters, trend analysis, and comparative visualizations to identify profitable and underperforming regions.

- Integrated key business metrics including total sales, profit percentage, and average profit to support data-driven decision making.

Workout Type Prediction Using Machine Learning

- Implemented machine learning algorithms including KNN, Decision Tree, Random Forest, SVM, and Neural Networks to predict workout types from gym activity data.
- Evaluated model performance using accuracy, precision, recall, F1-score, and confusion matrix metrics.
- Achieved 80% prediction accuracy using Neural Networks and performed comparative analysis to identify the best-performing model.

EDUCATION

B.Tech in Computer Science and Engineering, Lovely Professional University, Punjab, India | CGPA: 8.51 | Aug. 2022, July. 2026

CERTIFICATIONS

AI/ML COE Track, MAQ Software | Probability and Statistics, NPTEL | Data Science Using Tableau and R Programming, CSE Pathshala

AWARDS & RECOGNITIONS

Ranked among the Top 10 students at the State Level in Intermediate Examination
