PROFESSIONAL SUMMARY

Associate Software Engineer with hands-on experience designing, developing, and testing software solutions that deliver reliable features and meet quality standards. Experienced in automation testing using Selenium WebDriver with Java. Interested in data analytics and AI, with a strong willingness to learn and apply new technologies. Skilled in collaborating with team members, learning from feedback, and taking ownership of assigned tasks to ensure timely delivery of value to end users.

EXPERIENCE

MAQ Software

Nov. 2025 – Present

Associate Software Engineer

Hyderabad, India

- Designed and executed manual test cases for UI and API functionalities using **Postman**; identified and logged 15+ defects with detailed reproduction steps and validated fixes through retesting.
- Designed, developed, and maintained automated Smoke and Regression test scripts for three core application functionalities using **Java and Selenium WebDriver**, covering UI and API testing.
- Executed automated Smoke and Regression pipelines through **Jenkins** across multiple environments; analyzed execution results, debugged failures, and performed impact analysis to support reliable software delivery.
- Utilized **Git and Azure DevOps** for version control, branch management, collaboration, and traceability while following team **SDLC and Agile practices**.

PROJECTS

University FAQ RAG Chatbot

Python, Streamlit, LLaMA 3.1-8b, Sentence-Transformers

- Built a Retrieval-Augmented Generation (RAG) chatbot that answers university FAQs from uploaded PDF documents using sentence embeddings and semantic search.
- Implemented TF-IDF and Logistic Regression-based question classification and integrated the Groq API with LLaMA 3.1-8b for grounded response generation.
- Developed the complete pipeline including PDF extraction, chunking, embedding generation, vector search using NearestNeighbors, and Streamlit deployment.

Global Sales and Profit Insights Dashboard

Tableau

- Designed an interactive Tableau dashboard to analyze sales and profit across 165 countries and 1,102 states using geospatial visualizations and KPI metrics.
- Implemented filters, trend analysis, and comparative visualizations to identify profitable and under-performing regions.
- Integrated key business metrics including total sales, profit percentage, and average profit to support data-driven decision making.

Workout Type Prediction Using Machine Learning

R, Supervised Machine Learning

- Implemented KNN, Decision Tree, Random Forest, SVM, and Neural Networks to predict workout types from gym activity data.
- Evaluated models using accuracy, precision, recall, F1-score, and confusion matrix metrics; achieved 80% prediction accuracy using Neural Networks.
- Performed comparative analysis of model performance to identify the best-performing approach for the dataset.

EDUCATION

Lovely Professional University

Aug. 2022 – July 2026

B.Tech in Computer Science and Engineering | CGPA: 8.51

Punjab, India

SKILLS

Programming: Java, Python, SQL, C++, R

Software Engineering: SDLC, Agile, Git, CI/CD

Testing: Selenium WebDriver, Postman, Automation Testing, Manual Testing, Functional Testing, Regression Testing, Smoke Testing, TestNG

AI & Data: Machine Learning, NLP, RAG, LLMs, Prompt Engineering, Vector Databases

Tools & Technologies: Jenkins, Azure DevOps, GitHub, Tableau, Power BI, MySQL, Hadoop, Spark, Hive, Microsoft Excel

CERTIFICATIONS & ACHIEVEMENTS

- AI/ML COE Track – MAQ Software
- Probability and Statistics – NPTEL
- Data Science Using Tableau and R Programming – CSE Pathshala
- Ranked among the Top 10 students at the State Level in Intermediate Examination.
